DETAILED ACTION

Response to Amendment

The amendment filed on April 22, 2005 is sufficient to overcome the prior reference. The previous Office Action indicated, the originally presented claims to be rejected by a Double Patent Rejection with regard to U.S. Pat. No. 6,604,561, this was a typographical error, the U.S. Pat. No. should be 6,604,562. The Examiner has approved the Terminal Disclaimer received February 7, 2005.

Drawings

The drawings received on February 7, 2005. These drawings are approved.

EXAMINER'S AMENDMENT

An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

-Claim 1, lines 4-5, following the terms, for supporting the detachable head, "*for*" second occurrence; has been deleted to eliminate duplication.

Allowable Subject Matter

Claims 1-4 and 8-16 are allowed.

The following is an Examiner's statement of reasons for allowance: The prior art of record does not disclose or fairly suggest a tree pusher comprising means mounted on the base for supporting the detachable head, for attaching the detachable head to the tree, and *for separating the detachable head from the rest of the tree pusher as the tree falls, so that the detachable head remains attached to the tree as the tree falls* in combination with the rest of the claimed limitations as set forth in claims 1, 2, and 11.

The prior art reference, Atherton et al. discloses a tree pusher comprising several cylindrical tubes (fig. 2) wherein a detachable prong head (fig. 4) is attached to the top most cylindrical tube (74) via a set screw (76) for pushing a tree as the tree is felled. Although Atherton discloses the pronged head (30; fig. 4) to be detachable from the tube (74), Atherton does not disclose or fairly suggest means mounted *for separating the detachable head from the rest of the tree pusher as the tree falls, so that the detachable head remains attached to the tree as the tree falls* as set for the claims.

As set forth or invoked by 35 U.S.C. 112 6th paragraph, Atherton fails to disclose or fairly suggest equivalent structure *for separating the detachable head from the rest of the tree pusher as the tree falls*, instead, Atherton sets forth a cylindrical pronged head (30) that is attachable to a or coupled to a cylindrical tube (74) via a set screw (76) such that the set screw limits movement of the pronged head (30) as it relates to the tube (74) allowing the head (30) to remain coupled/attached to the tube (74) as the tree falls. Accordingly, Atherton neither anticipates nor renders obvious the claimed invention as set forth in claims 1, 2, and 11.

Art Unit: 3725

Neither the prior art of record nor any combination thereof discloses the claimed invention as set forth in claims 1, 2, and 11, thus the claims and their dependents are allowable over the prior art of record.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
